

## ENVIRONMENTAL POLICY FOR AB ELEKTROKOPPAR

AB Elektrokoppar will sell and manufacture copper and aluminum products and their alloys. We have an integrated management system that the environmental management system is part of.

We develop our products and services to contribute to a long-term sustainable society.

We work with continuous improvements to protect the environment and prevent the risk of pollution.

We place as high environmental requirements on our suppliers and other partners as we do on our own operations.

We comply with laws and other requirements that we are affected by.

We create environmental goals that give us challenges and that everyone in the organization can relate to.

Our environmental impact mainly concerns the consumption of energy and emissions to air.
